Additional notes

1. All D550 SH Curve indicated on plan shall be replaced with the D550 Curve. D550 SH Curve only serve as representation for the D550 Curve to work around some issues with the program.
2. Consistency with lighting solutions is a high priority in semi-modular projects such as this one. Our lighting suggestions, then, will be based on the type of space served by the lights.
3. Garages shall have SL3500 shop lights as main lighting, with 55-degree D900+ Curve fixtures as supplement for accessory areas (Shelves, Utility, Recycle Bin, etc)
4. Hallways are provided with D550 Curve fixtures in 3000K, with additional W200 Curve wall lights for Entries facing a wall.
5. Stairways shall have P900 Curve pendant lights overhead above the mid-height stair landings.
6. Utility spaces (Laundry, Storage) are provided with D550 Curve downlights in 4000K for task lighting
7. Bathrooms shall either be provided with D900 Classic Curve downlights in 4000K for those with larger floor area, or D550 Curve downlights in 4000K for those with smaller floor area.
8. Living Room and Kitchens shall be provided with the D900+ Curve downlights in 3000K, providing bright enough light for different types activities. Shall there be overhead cupboards at the Kitchen, placing LED strip lights under these cupboards is also highly recommended.
9. Bedrooms shall have D700+ downlights in 3000K for softer lighting, ideal for private spaces.
10. Where a balcony is covered, D900 SH Curve surface-mounted downlights are suggested.

Compatibility

Recommended Dimmers:
Clipsal, Universal
Clipsal, Trailing Edge
Legrand 400T, Trailing Edge

*Compatible with many centralised control systems such as Clipsal C-Bus. All systems are unique, please call 1300 672 499 for advice on your installation.

Installation

Step 1

Cut a 67mm dia hole into the ceiling or wall at the desired location.

Step 2

Plug the driver to a mains power socket located in the wall or ceiling.

Step 3

Pull the springs up and insert the luminaire in the hole.

Step 4

Installation complete.

Installation

Step 1

Using a 92mm holesaw, cut a hole in the ceiling at the desired location.

Step 2

Plug the driver to a mains power socket located in the ceiling.

Step 3

Pull the springs up and insert the luminaire in the hole.

Step 4

For a trimless installation, no further steps are required.

Step 7

Optional fascias can be interchanged.
Align the fascia with the fixture's lip.

Step 8

Screw the fascia clock wise until firmly in place.

Step 15

Orientate the light beam direction by tilting the luminaire.

Installation

Step 1

Disconnect all power at the switchboard.
Release the base plate from the D900 SH body by unscrewing the 3 retaining grub screws, then feed the power cable through the base plate and attach base plate to the roof * for more information refer to D900 SH installation guide.

Step 2

Open the junction box and connect the power cable to the junction box. Re-attach cover of junction box inline with Australian standards.

Installation

Step 3

Align and attach the D900 SH body to the base plate then screw in the three grub screws to secure the D900 SH to the ceiling.

Step 4

Installation complete.

Step 7

Ceiling mount hole piloting.

a=51.5mm ; b=29.5mm ; c=9mm

Compatibility

Recommended Dimmers:
Universal Dimmers
Trailing Edge Dimmers
Leading Edge Dimmers
Dali Dimmers (available on request)

*Compatible with many centralised control systems such as Clipsal C-Bus. All systems are unique, please call 1300 672 499 for advice on your installation.

Installation

Step 1
Fix the mounting plate to the ceiling using two screws.

Step 2
Connect AC wires using the junction box.

Step 3
Mount the cover plate and fasten the two side screws.

Step 7
Installation complete, the P900 CR is now operational.

Step 4
Adjust the luminaire height, by releasing the cord retention. Once the desired height is achieved, fasten the retention.

Installation

Step 1

Cut a 220 X 125 mm rectangular cutout at the desired location.

Step 2

Plug the driver to a 220VAC mains power socket, located inside the wall/ceiling cavity.

Step 3

Lift the springs up and insert the SL3500 inside the cutout.

Step 4

Installation complete.

Step 7

Tilt the luminaire in order to orientate the light beam.
